

Income Fund

INSTITUTIONAL CLASS ACCUMULATION AND INCOME SHARES

Fund Description

The Income Fund is a portfolio that is actively managed and utilizes a broad range of fixed income securities that seek to produce an attractive level of income with a secondary goal of capital appreciation.

Investor Benefits

This fund seeks to meet the needs of investors who are targeting a competitive and consistent level of income without compromising total return. The fund aims to achieve this by employing PIMCO's best income-generating ideas across global fixed income sectors with an explicit mandate on risk-factor diversification. The fund offers daily liquidity.

The Fund Advantage

The fund taps into multiple areas of the global bond market, and employs PIMCO's vast analytical capabilities and sector expertise to help temper the risks of high income investing. This approach seeks to provide consistent income over the long term.

Risk Profile

Unit value can go up as well as down and any capital invested in the fund may be at risk. The fund may invest in non-U.S. and non-eurozone securities which involve potentially higher risks including currency fluctuations and political or economic developments. These may be enhanced when investing in emerging markets. Funds that invest in high-yield, lower-rated securities, will generally involve greater volatility and risk to principal than investments in higher-rated securities. The fund may use derivatives for hedging or as part of its investment strategy which may involve certain costs and risks. Portfolios investing in derivatives could lose more than the principal amount invested. For more details on the fund's potential risks, please read the Prospectus and Key Investor Information Document.

Institutional Class Overall Morningstar Rating™

INCOME FUND

Hypothetical Growth of 10K

Source: PIMCO. **Past Performance is not a guarantee or reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future.** Growth of 10,000 is calculated at NAV and assumes that all dividend and capital gain distributions were reinvested. It does not take into account sales charges or the effect of taxes. Share value may go up as well as down as a result of currency fluctuations.

ABOUT THE BENCHMARK

Bloomberg U.S. Aggregate Index represents securities that are SEC-registered, taxable, and dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities. These major sectors are subdivided into more specific indices that are calculated and reported on a regular basis. It is not possible to invest directly in an unmanaged index.

Unless otherwise stated in the prospectus, the Fund is not managed against a particular benchmark or index, and any reference to a particular benchmark or index in this factsheet is made solely for risk or performance comparison purposes.

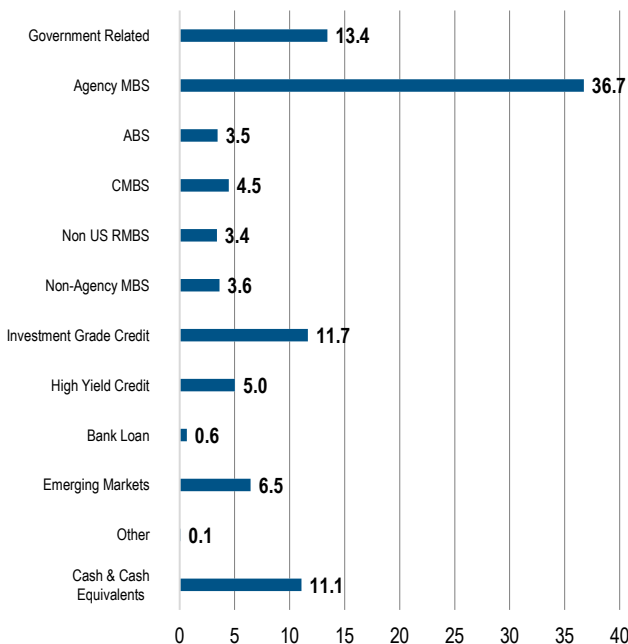

Performance (Net of Fees)	1 Mo.	3 Mos.	6 Mos.	1 Yr.	3 Yrs.	5 Yrs.	10 Yrs.	SI

Past Performance is not a guarantee or reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future. The benchmark is the Bloomberg U.S. Aggregate Index. All periods longer than one year are annualised. SI is the performance since inception. Performance shown is on a NAV-to-NAV basis in the denominated currency and are net of fees and other expenses and include reinvestment of dividends, as applicable.

Sector Allocation (%)

Sector Allocation (Duration in Years)

Duration (% Duration Weighted Exposure)

Maturity (% Market Value)

Market Value % may not equal 100 due to rounding.

Countries are categorized by currency of settlement. EMU-member countries reflect the country of exposure for EUR-denominated securities. Europe represents European Union instruments that cannot be separated by specific country.

Top 10 Countries by Contribution to Total Duration (% Duration Weighted Exposure)

Sector Allocation: The Sector Allocation displays Gross Market Value data which is calculated differently than Percent Market Value (PMV%), which is the Fund's official sector reporting. Gross Market Value reflects sector exposures as a percentage of the sum of the total Gross Market Value of the portfolio. Exposures gained through the use of interest rate swaps and futures are calculated at the market value of these instruments. GMV excludes reverse repos and lines of credit from its calculation. Portfolio structure is subject to change without notice and may not be representative of current or future allocations.

Cash & Cash Equivalents may include but is not limited to cash, currency, short-term investment funds, commercial paper and repos. **Government Related** includes nominal and inflation-protected Treasuries, agencies and FDIC-guaranteed and government-guaranteed corporate securities from the U.S., Japan, United Kingdom, Australia, Canada, European Union and other peripheral countries. **Non US RMBS** includes residential mortgage backed securities domiciled outside of the United States. **ABS** contains traditional ABS, CLOs and CDOs. **Other** may contain but is not limited to municipal securities and whole loans.

Ⓢ Yields reported gross of fees, the deduction of which will reduce the yield. Yields are reported in the base currency of the fund and are not specific to the share class. PIMCO calculates a Fund's Estimated Yield to Maturity by averaging the yield to maturity of each security held in the Fund on a market weighted basis. PIMCO sources each security's yield to maturity from PIMCO's Portfolio Analytics database. When not available in PIMCO's Portfolio Analytics database, PIMCO sources the security's yield to maturity from Bloomberg. When not available in either database, PIMCO will assign a yield to maturity for that security from a PIMCO matrix based on prior data. The source data used in such circumstances is a static metric and PIMCO makes no representation as to the accuracy of the data for the purposes of calculating the Estimated Yield to Maturity. The Estimated Yield to Maturity is provided for illustrative purposes only and should not be relied upon as a primary basis for an investment decision and should not be interpreted as a guarantee or prediction of future performance of the Fund or the likely returns of any investment. † Annualised Distribution Yield is as of last month ending 01/31/2026. Duration is a measure of a portfolio's price sensitivity expressed in years. PIMCO duration calculation that adjusts the durations of credit securities to account for the potential that in the event of default investors will receive the recovery amount prior to the maturity of the security. Negative allocations may result from derivative positions and unsettled trades and does not imply the fund is short cash, is levered, or that the derivatives are not fully cash backed. Duration is the sensitivity of a fixed income security to a change in interest rates. The longer the duration of a fixed income security, the higher its sensitivity to interest rates. Duration Weighted Exposure (DWE%) is the percentage weight of each sector's contribution to the overall duration of the fund. Morningstar ratings are shown for funds with 4 or 5 star ratings only. Other share classes ratings are either lower or unavailable. A rating is not a recommendation to buy, sell or hold a fund. Copyright © 2026 Morningstar, Inc. All Rights Reserved.
