Benefits

Easy access to investment opportunities provided by a rapidly growing Chinese economy. Investors gain access to local Chinese shares, e.g. China A shares.

An experienced portfolio management team, that can leverage local investment expertise in the Chinese market via our joint venture UBS SDIC in China

Risks

UBS Opportunity Equity Funds invest in equities and may therefore be subject to high fluctuations in value. As these UBS Funds pursue an active management style, each Fund's performance can deviate substantially from that of its reference index. All investments are subject to market fluctuations. This Fund has specific risks related to Chinese investments, which can significantly increase given the specific market and market regulation. This Fund may not be appropriate for investors who plan to withdraw their money before the recommended holding period disclosed in the PRIIPs KID, if available for this share class.

Your capital is at risk. The value of an investment may fall as well as rise and you may not get back the original amount. Please note that additional fees (e.g. entry or exit fees) may be charged. Please refer to your financial adviser for more details. Investors should read the Key Information Document, Prospectus and any applicable local offering document prior to investing and to get complete information of the risks. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. For a definition of financial terms refer to the glossary available at www.ubs.com/am-glossary.

For marketing and information purposes by UBS. For professional clients / qualified investors only. UBS funds under Luxembourg law. Arrangements for marketing fund units mentioned in this document may be terminated at the initiative of the management company of the fund(s). Before investing in a product please read the latest prospectus and key information document or similar legal documentation carefully and thoroughly. Any decision to invest should take into account all the characteristics or objectives of the product as described in its prospectus, or similar legal documentation. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. The information and opinions contained in this document have been compiled or arrived at based upon information obtained from sources believed to be reliable and in good faith, but is not guaranteed as being accurate, nor is it a complete statement or summary of the securities, markets or developments referred to in the document. Any Index referenced in this document is not administered by UBS. Members of the UBS Group may have a position in and may make a purchase and / or sale of any of the securities or other financial instruments mentioned in this document. Units of UBS funds mentioned herein may not be eligible for sale in all jurisdictions or to certain categories of investors and may not be offered, sold or delivered in the United States. The information mentioned herein is not intended to be construed as a solicitation or an offer to buy or sell any securities or related financial instruments. Past performance is not a reliable indicator of future results. The calculated performance takes all costs on the product level into consideration (ongoing costs). The entry and exit costs, which would have a negative impact on the performance, are not taken into consideration. If whole or part of the total costs to be paid is different from your reference currency, the costs may increase or decrease as a result of currency and exchange rate fluctuations. Commissions and costs have a negative impact on the investment and on the expected returns. If the currency of a financial product or financial service is different from your reference currency, the return can increase or decrease as a result of currency and exchange rate fluctuations. This information pays no regard to the specific or future investment objectives, financial or tax situation or particular needs of any specific recipient. Future performance is subject to taxation which depends on the personal situation of each investor and which may change in the future. The details and opinions contained in this document are provided by UBS without any guarantee or warranty and are for the recipient's personal use and information purposes only. This document may not be reproduced, redistributed or republished for any purpose without the written permission of UBS Asset Management Switzerland AG or a local affiliated company. Source for all data and charts (if not indicated otherwise): UBS Asset Management. The product described herein aligns to Article 8 Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector. Information on sustainability-related aspects pursuant to that regulation can be found on www.ubs.com/funds. The benchmark is the intellectual property of the respective index provider. The fund or the share class is neither sponsored nor endorsed by the index provider. The fund prospectus or supplemental prospectus contains the full disclaimer. This document contains statements that constitute "forward-looking statements", including, but not limited to, statements relating to our future business development. While these forward-looking statements represent our judgments and future expectations concerning the development of our business, a number of risks, uncertainties and other important factors could cause actual developments and results to differ materially from our expectations. **Luxembourg:** Prospectuses, key information document (KID) where applicable, the articles of association or the management regulations as well as annual and semi-annual reports are available for the purpose of inspection and obtaining copies thereof in a language required by the local applicable law free of charge at UBS Asset Management (Europe) S.A., 33A avenue J.F. Kennedy, 1855 Luxembourg and online at www.fundinfo.com. A summary of investor rights in English can be found online at www.ubs.com/funds-regulatoryinformation. ESG Report

Terminology used within this document refers to definitions in the UBS Sustainable Investing Framework and does not refer or relate in any way to any regulatory provisions. Where applicable, a country-specific notice is provided in this document and must be read in conjunction with the factsheet.

ESG is an abbreviation for Environmental, Social and Governance (factors). These factors are used to evaluate companies and countries on how advanced they are with respect to sustainability. Once sufficient data on these factors are available, they can be used to assess and compare assets and also to inform the investment process when deciding what assets to buy, hold or sell.

ESG Performance

The following illustrations show the fund's performance against sustainability criteria that are either explicitly part of the fund's ESG objectives or are included in the investment process.

Country-specific notice:

UK: If this product is distributed in the UK, please note: This product is based overseas and is not subject to the UK sustainable investment labelling and disclosure requirements (SDR). This product does not make any claims under the UK SDR. Terminology used within this document refers to definitions in the UBS Sustainable Investing Framework and does not refer or relate to the UK SDR in any way.

Glossary

Carbon footprint: Expresses the greenhouse gas footprint of an investment sum. The carbon emissions scope 1 and 2 are allocated to investors based on an enterprise value (including cash) ownership approach and are normalized by the current fund value. The carbon footprint is a normalized measure of a fund's contribution to climate change that enables comparison with a benchmark, between funds and between individual investments. The metric is total carbon emissions expressed as per currency invested.

The metric is scaled up to 100%, if actual data coverage is above the defined thresholds – fixed income: 50%, equities: 67%, multi-asset: 50%. Otherwise, the metric is reported as "-".

Classification system to separate corporate and sovereign issuers: Bloomberg Barclays Methodology. Securitised bonds are excluded from the calculation. "No exposure" if the fund is not invested in the respective issuers for the month.

Controversy check: Controversial Business Involvement exposure is the exposure to companies with a revenue share exceeding a certain threshold of the respective field (production). Link to our exclusion policy for more details: [-> www.ubs.com/si-exclusion-policy](http://www.ubs.com/si-exclusion-policy)

ESG score (UBS Blended ESG Score*): The UBS Blended ESG Score is based on UBS-internal and independent external ESG data sources. The UBS Blended ESG Score is industry-adjusted and measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The metric is scaled up to 100% if actual data coverage is above the defined thresholds – fixed income: 50%, equities: 67%, multi-asset: 50%. Otherwise, the metric is reported as "-". Classification system to separate corporate and sovereign issuers: Bloomberg Barclays Methodology. Securitised bonds are excluded from the calculation. "No exposure" if the fund is not invested in the respective issuers for the month.

* more details available at this [link](#)

MSCI ESG scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The individual MSCI E-, S-, and G-score indicates the resilience of issuers to environmental, social or governance related risks that are most material to an industry. The aggregated MSCI ESG score is based on these MSCI E-, S-, and G-scores but normalizes them relative to industry peers. This leads to a weighted average industry-adjusted MSCI ESG score which is comparable across industries. The metric is scaled up to 100% if actual data coverage is above the defined thresholds – fixed income: 50%, equities: 67%, multi-asset: 50%. Otherwise, the metric is reported as "-".

UBS AM sustainability approaches applied:

Exclusion: Strategies that exclude securities from funds where they are not aligned to an investor's values. Includes customized screening criteria.

ESG Integration: Strategies that integrate environmental, social and governance (ESG) factors into fundamental financial analysis to improve the risk/return profile.

SI Focus: Strategies where sustainability is an explicit part of the investment guidelines, universe, selection and/or investment process.

Impact: Strategies where the intention is to generate measurable environmental and/or social benefits ("impact") alongside the financial return.

Voting: UBS Asset Management will actively exercise voting rights based on the principles outlined in the UBS Asset Management Proxy Voting policy and our stewardship approach, with two fundamental objectives: 1. To act in the best financial interests of our clients to enhance the long-term value of their investments. 2. To promote best practice in the boardroom and ensure that investee companies are successful. This is not an indication that voting on sustainability-related topics has taken place with respect to companies in this portfolio during any given time period. For information about voting activities with specific companies please refer to the UBS Asset Management Stewardship Annual Report.

Engagement program: We regard engagement to be a two-way mutually beneficial dialogue with an issuer / company, with the objective to share information, enhance understanding and help to improve business practices and performance. The issuers / companies we engage with are selected from across the universe in which UBS Asset Management invests using a top-down approach in accordance with our principles, as outlined in our stewardship approach. This is not an indication that sustainability-related engagement has taken place with respect to issuers / companies in this portfolio during any given time period or that issuers / companies in this portfolio were chosen with the goal to actively engage. Information on UBS Asset Management's selection of issuers / companies, engagement activities, prioritization process and understanding of concerns can be found in the UBS Asset Management Stewardship Annual Report and in our stewardship approach.

Aggregation of ESG/carbon data: ESG scores of holdings in the portfolio and the reference index are aggregated based on their respective individual weights and ESG scores (sumproduct).

Fund of funds investments, derivatives and cash:

Derivatives and fund of funds investments used in the portfolio are treated on a lookthrough basis, whereby the economic exposures to the underlying basket of securities is treated as an actual investment in the individual securities that make up this basket. Broad market derivatives or fund of funds investments may lead to minimal exposures to securities that are excluded from direct investments. Derivatives have an effect on all metric calculations. Given that many of the reporting frameworks available to investors today do not cover the intricacies of derivatives, metrics are provided on a

UBS China A Opportunity Equity Fund USD

ESG Report

reasonable efforts basis. Portfolios for which we report the sustainability metrics may include cash. The information disclosed in this report, in particular the treatment of derivatives and cash, may or may not correspond with the investment characteristics of the fund and how the fund is managed. The sustainability metrics in this report may therefore differ from other UBS reports produced on the same date.

MSCI ESG Fund Ratings are designed to measure the environmental, social and governance (ESG) characteristics of a fund's underlying holdings, making it possible to rank or screen mutual funds and ETFs on a AAA to CCC ratings scale.

Weighted average carbon intensity – corporate issuers/ carbon-intensive sovereign issuers: These metrics measure a fund's exposure to carbon-intensive companies and governments. These metrics provide an insight into potential risks related to the transition to a lower-carbon economy, because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. These metrics are applicable across asset classes. It is the sumproduct of the fund weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales or GDP). The metric is scaled up to 100% if actual data coverage is

above the defined thresholds – fixed income, 50%; equities: 67%, multi-asset: 50%. Otherwise, the metric is reported as "-". Classification system to separate corporate and sovereign issuers: Bloomberg Barclays Methodology. Securitized bonds are excluded from the calculation. "No exposure" if the fund is not invested in the respective issuers for the month.

The **Morningstar ESG Risk Rating** helps investors see how mutual funds and ETFs are meeting environmental, social, and corporate governance (ESG) challenges. The rating is given as 1 to 5 "globes," with more globes indicating lower ESG risk. Notably, the number of globes a fund receives is determined relative to other funds in the same Morningstar Global Category.

Active ESG: Benchmark selection is driven by portfolio implementation considerations, in particular to closely reflect the financial objectives of the fund. For actively managed strategies, a traditional benchmark is generally selected to provide a broad investment universe to which active management is applied. This enables an assessment of the magnitude of ESG improvements against the traditional benchmark and allows the costs and benefits of investing sustainably to be assessed.

Important information about sustainable investing strategies

Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and fund construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or sustainable investing considerations may inhibit UBS's ability to participate in or to advise on certain investment opportunities that otherwise would be consistent with the Client's investment objectives. The returns on a fund consisting primarily of sustainable investments may be lower or higher than funds where ESG factors, exclusions, or other sustainability issues are not considered by UBS, and the investment instruments available to such funds may differ. Companies, product issuers and/or manufacturers may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues.

Reconciliation of Assets under Management (AuM)

This report does not contain reconciled AuM positions, it only takes in consideration positions with settlement date as of report date. This means that traded but not settled positions are not included. Therefore, AuM figures in this report may differ from other UBS reports produced on the same date.
