Investment in mutual Funds is not a money deposit.

What are you investing in?

1.1 Investment Policy

1. Underlying asset

TMB India Active Equity Fund will mainly invest in off-shore mutual fund (Master fund), namely Goldman Sachs India Equity Portfolio Class I Shares (Acc.) invests for not less than 80% on accounting-year average of its net asset value which is listed on the Luxembourg Stock Exchange and operating under the regulations of UCITS. The Master Fund has been managed by Goldman Sachs Asset Management Global Services Limited and invested in USD currency

2. Master fund's investment policy

Goldman Sachs India Equity Portfolio seeks to provide capital growth over the long term. Goldman Sachs India Equity Portfolio will be invested at least two third of its net asset value in equity instruments, equity related transferable securities and fund relating to India companies. Such companies are either based in or earn most of their profit or revenue from India.

Moreover, Goldman Sachs India Equity Portfolio may use derivatives for efficient portfolio management purpose, to help manage risks and for investment purpose in order to seek to increase return.

Investors can view more Master Fund Information at

www.gsam.com/TMBIndiaActiveEquityFund

1.2 Management Style

1. TMB India Active Equity Fund aims to achieve return reflecting the performance of the Master Fund (passive management)

2. Goldman Sachs India Equity Portfolio (Master Fund) applies an active management strategy

Who is the Fund suitable for?

Investors who would like to diversify their investment risk in offshore market for long-term investment and can accept risk associated with such foreign investment and price volatility of the Master Fund

This fund is not suitable for:

1. Investors who need to use money in the near future.
2. Investors who are unable to accept the volatility of investment and returns, both short term and long term.

For further clarification on this investment policy and potential risks, what should you do?

- Read the full prospectus or seek advice from the management company or its appointed selling agents.
- Do not invest without sufficient understanding on the characteristics and risks of this Fund.

What are the key risks of the Fund?

Warnings & Recommendation

1. TMB India Active Equity fund is not capital protection fund. Investors may have risk of losing initial investment.

2. Goldman Sachs India Equity Portfolio (Master Fund) was raised money from the investors in USD currency and bring that money invest in various currencies according to the invested countries. The master fund does not invest in derivatives for the purpose of hedging. Investors may get loss or gain from USD currency to currencies according to the invested currencies. India Active Equity Fund will invest in the Master Fund in USD currency and may enter into derivatives for the purpose of hedging according to the Fund Manager discretion. TMB India Active Equity fund may get positive or negative impact from the fluctuation of other foreign currency such as Indian rupee exchange. Investors may get loss or gain from foreign currency exchange or receiving the return than the initial investment.

3. TMB India Active Equity Fund and Goldman Sachs India Equity Portfolio (Master Fund) may invest in derivatives to efficiently manage its portfolio. Therefore, this fund has higher risk than other funds, it thus suits the type of investor who can accept higher risk for higher returns. Investors should invest in this Fund only when fully understand about derivatives and should consider the investing experience, investment objective and financial position before investing in this Fund.

4. TMB India Active Equity Fund may invest in derivatives. This fund has higher risk than other funds. It thus suits the type of investor who can accept higher risk for higher returns and subject to higher risk more than regular fund

5. TMB India Active Equity Fund is able to invest in non-investment grade, unrated and unlisted instrument. The investor may be subject to higher risk more than regular fund e.g. issuer default risk or lack of instrument liquidity risk.

6. TMB India Active Equity Fund is exposed to country risk since the master fund mainly invests in India. TMB India Active Equity fund may get positive or negative impact more than diversified portfolio in many countries and many industries.

7. To comply with the terms and conditions of the Master Fund, the Management company reserves the right to submit unitholder information (including information of previous unitholders of this fund) to the Master fund (which shall include relevant parties) and relevant government authorities, both local and foreign, when there is a case where such unitholder possesses (either directly or indirectly) more than 10 % of the fund, or when information is requested or required by the Master Fund. This includes the request for additional information from the unitholder and/or from selling agent (including LBDU) that the unitholder transacts through. In addition, the Management Company reserves the right to suspend or terminate services and to proceed with the redemptions for unitholders who are un-cooperative or unitholders with qualifications prohibited by the Master Fund, which is subject to change from time to time.

It shall be deemed that Eastspring has already received consents for Eastspring's actions that stated above from the unitholders. It shall also be deemed

that Eastspring's selling agents(including LBDU) has already received consents to provide unitholders' information to Eastspring, the Master Fund, and the relevant government authorities, both local and foreign.

8. Eastspring has an objective not to offer its fund units to or for the benefit of

1) Citizens of the USA or residents of the USA [including the territories of or occupied /controlled by the USA] including those who hold US passports or green cards.

2) Legal entities organized under the US law including company Limited Partnership, etc., as well as the branch of such entities.

3) Organizations belonging to the US Government in the USA and outside the USA.

4) Investors who contact or receive information or place order related to Eastspring 's fund or pay/receive payment with respect to Eastspring's fund in the USA. This also includes investors who use the agent/ manager in the USA to perform such functions.

5) The assets (such as private fund/trust) of the aforesaid persons or legal entities in 1-4. As such,

Eastspring reserve its right to deny or restrain subscription, allocation and/or transfer its fund unit for the above -mentioned investors, whether directly or indirectly.

9. In the event that the Management Company has entered into an obligation or agreement with a foreign state and/or the government of a foreign state or if it is required to comply with a law or a regulation of a foreign state regard less of the

effective date of such obligation (e.g. the United States Foreign Account Tax Compliance Act (FATCA)), the Unitholder(s) acknowledge and agree that the Management Company may act or perform its obligation according to the relevant law and/ or regulation to which Management Company is subject, including but not limited to disclosing information of the Unitholder(s) or withholding and withhold able payment payable to the Unitholder(s),and may act or perform any other action necessary for complying such relevant Thai and foreign law and/or regulation to which the Management Company is subject, and shall provide any information ,document, and consent to Management Company upon request in performing such duty.

Risk Speotrum of the Fund

Explanation of Risk

- market risk

standard deviation : SD

Market Risk means the risk that the values of securities which the Fund has invested may increase or decrease due to outside factors such as economic/ investment situations, political factors both internally and internationally which could be considered from the Standard Deviation (SD) of the Fund. If the Fund has a high SD, it is an indicator that the Fund has high a fluctuation from the changes in the prices of securities.

High sector concentration risk

Remark : The concentration occurs among Finance and Securities

High country concentration risk

Remark : Remark : The concentration occurs among INDIA

- exchange rate risk

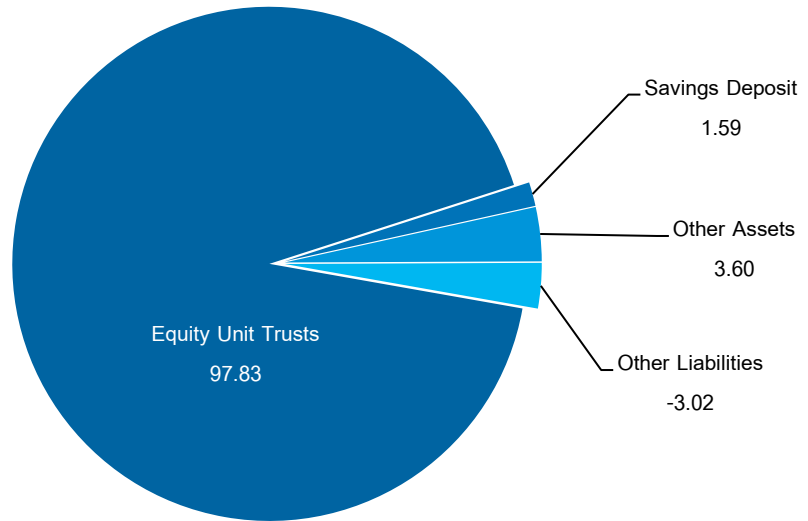

Currency Risk is the possibility that changes in exchange rate will affect the value of investment units. For example, if a mutual fund invests in securities denominated in US Dollar during Thai Baht depreciation and the units are subsequently sold when Thai Baht appreciates, the mutual fund will receive lower return in Thai Baht. On the other hand, if the same fund invests in securities denominated in US Dollar during Thai Baht appreciation and the units are subsequently sold when Thai Baht depreciates, the mutual fund will receive higher return in Thai Baht. Therefore, currency hedging techniques as follows are key tools to manage such risk.

- Hedging at discretion of the fund manager: Investors may be exposed to currency risk because it is the discretion of the fund manager whether to use a currency hedging technique.
