WHY INVEST IN ARKQ?

Exposure to Innovation: Aims for thematic multi-cap exposure to innovation elements including robotics, autonomous vehicles, energy storage, 3D printing, and space exploration.

Growth Potential: Aims to capture long-term growth with low correlation of relative returns to traditional growth strategies and negative correlation to value strategies.

Tool for Diversification: Offers a tool for diversification due to little overlap with traditional indices. It can be a complement to traditional value/growth strategies.

Grounded in Research: Combines top-down and bottom-up research in its portfolio management to identify innovative companies and convergence across markets.

Cost Effective: Provides a lower cost alternative to mutual funds with true active management in an Exchange Traded Fund (ETF) that invests in rapidly moving themes.

GROWTH OF 10,000 USD SINCE INCEPTION

The line graph represents the cumulative performance of a hypothetical \$10,000 investment. The returns are net of the ETF's expenses but do not reflect the payment of any brokerage commissions or brokerage costs incurred as a result of buying or selling fund shares and do not reflect the deduction of taxes to which an investor would be subject as a result of owning or selling shares of the fund. If they did, the returns would be lower than those shown.

Past performance does not guarantee future results. The performance data quoted represents past performance and current returns may be lower or higher. The investment return and principal will fluctuate so that an investor's shares when redeemed may be worth more or less than the original cost. For the Fund's most recent month end performance, please visit www.ark-funds.com or call 1-800-679-7759. Returns for less than one year are not annualized. Net asset value ("NAV") returns are based on the dollar value of a single share of the ETF, calculated using the value of the underlying assets of the ETF minus its liabilities, divided by the number of shares outstanding. The NAV is typically calculated at 4:00 pm Eastern time on each business day the Cboe BZX Exchange is open for trading. Market returns are based on the trade price at which shares are bought and sold on the Cboe BZX Exchange, Inc. using the last share trade. Market performance does not represent the returns you would receive if you traded shares at other times. Total Return reflects reinvestment of distributions on ex-date for NAV returns and payment date for Market Price returns. The market price of the ETF's shares may differ significantly from their NAV during periods of market volatility.

FUND OBJECTIVE

ARKQ is an actively managed ETF that seeks long-term growth of capital by investing under normal circumstances primarily (at least 80% of its assets) in domestic and foreign equity securities of autonomous technology and robotics companies that are relevant to the Fund's investment theme. Autonomous technology and robotics companies are companies that the Adviser believes are expected to focus on, among other things, disruptive innovation in automation and manufacturing, transportation, energy, artificial intelligence, and materials.

Before investing you should carefully consider the Fund's investment objectives, risks, charges and expenses. This and other information is in the prospectus, a copy of which may be obtained by visiting www.ark-funds.com. Please read the prospectus carefully before you invest.

The principal risks of investing in ARKQ: **Equity Securities Risk.** The value of the equity securities the Fund holds may fall due to general market and economic conditions. **Foreign Securities Risk.** Investments in the securities of foreign issuers involve risks beyond those associated with investments in U.S. securities. **Industrials Sector Risk.** Companies in the industrials sector may be adversely affected by changes in government regulation, world events, economic conditions, environmental damages, product liability claims and exchange rates. **Consumer Discretionary Risk.** Companies in this sector may be adversely impacted by changes in domestic/international economies, exchange/interest rates, social trends and consumer preferences. **Information Technology Sector Risk.** Information technology companies face intense competition, both domestically and internationally, which may have an adverse effect on profit margins. Detailed information regarding the specific risks of ARKQ ETF can be found in the prospectus. Additional risks of investing in ARKQ include equity, market, management and non-diversification risks, as well as fluctuations in market value and NAV. An investment in an ETF is subject to risks and you can lose money on your investment in an ETF. There can be no assurance that the ETF will achieve its investment objective. The ETF's portfolio is more volatile than broad market averages. Shares of ARKQ are bought and sold at market price (not NAV) and are not individually redeemed from the ETF. ETF shares may only be redeemed directly with the ETF at NAV by Authorized Participants, in very large creation units. There can be no guarantee that an active trading market for ETF shares will develop or be maintained, or that their listing will continue or remain unchanged. Buying or selling ETF shares on an exchange may require the payment of brokerage commissions and frequent trading may incur brokerage costs that detract significantly from investment returns.

Index Descriptions: The S&P 500® Index is a widely recognized capitalization-weighted index that measures the performance of the large-capitalization sector of the U.S. stock market. **The MSCI World Index** represents large and mid-cap equity performance across 23 developed markets countries. Returns shown for the MSCI World Index are net of foreign withholding taxes applicable to U.S. investors. Securities in the ETF's portfolio will not match those in any index. The ETF is benchmark agnostic and corresponding portfolios may have significant noncorrelation to any index. Index returns are generally provided as an overall market indicator. You cannot invest directly in an index. Although reinvestment of dividend and interest payments is assumed, no expenses are netted against an index's returns. Index performance information was furnished by sources deemed reliable and is believed to be accurate, however, no warranty or representation is made as to the accuracy thereof and the information is subject to correction.

Glossary: Active Share is a measure of the percentage of stock holdings in a manager's portfolio that differ from the benchmark index. **Value Strategy:** Traditional value investing is an investment strategy where stocks are selected that trade for less than their intrinsic values. **Growth Strategy:** Traditional growth investing is an investment strategy that focuses on stocks, whose earnings are expected to grow at an above-average rate compared to its industry or the overall market. **Correlation:** The degree to which two strategies move in relation to each other.
