Fund overview

ISIN

IE000U9J8HX9

Investment objective: The objective of the Sub-Fund is to provide income and long-term capital growth.

Investment policy: The Sub-Fund pursues an actively-managed investment strategy.

The Sub-Fund aims to (i) invest in a portfolio of equity securities comprising primarily of companies that are domiciled in, or carrying out the main part of their economic activity in the USA, and (ii) sell equity call options and/or equity index call options, to generate an income through the associated dividends and options premiums.

(i) Equity Portfolio

The Sub-Fund aims to invest at least 67% of its assets (excluding assets held for ancillary liquidity purposes) in equity securities issued by companies that are domiciled in, or carrying out the main part of their economic activity in the USA.

The Sub-Fund may also invest in equity securities issued by companies from any other country.

(ii) Equity Call Options/Equity Index Call Options

The Investment Manager seeks additional income through employing a financial derivative instrument ("FDI") overlay strategy which will be implemented by systematically selling equity call options and/or equity index call options which will typically have exposure to indices comprised of Benchmark Securities. The income provided from the option premiums is an important source of the Sub-Fund's return and may also reduce the Sub-Fund's volatility, the income generated from the option premiums may help offset any losses from the equity portfolio. However, investors should also note that the losses from the sale of equity call options and/or equity index call options may also offset the Sub-Fund's profits from increases in the value of the equity portfolio.

Investment approach

- Uses a data science driven investment approach that combines research, data insights, and risk management.
- Overlays a US large cap growth equity portfolio with index options with the aim of generating income through option premiums and stock dividends.
- Use of options overlay to allow for income generation that flexibly adjusts with the market.

Investor profile: Typical investors in the Sub-Fund are expected to be investors seeking broad exposure to the US equity market, and who are prepared to accept the risks associated with an investment of this type, including the volatility of such an investment approach.

ESG information

ESG approach - Integrated

ESG Integration is the systematic inclusion of financially material ESG factors, alongside other relevant factors, in investment analysis and investment decisions with the goals of managing risk and improving long-term returns. ESG integration does not by itself change this product's investment objective, exclude specific types of companies or constrain its investable universe. This product is not designed for investors who are looking for a product that meets specific ESG goals or wish to screen out particular types of companies or investments, other than those required by any applicable law such as companies involved in the manufacture, production or supply of cluster munitions. ESG integration does not imply that the Fund is marketed or authorised as an ESG product in any jurisdiction where such authorisation is required.

Key risks

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions, sometimes rapidly or unpredictably. If a company goes through bankruptcy or a similar financial restructuring, its shares in issue typically lose most or all of their value.

The value of FDIs can be volatile. This is because a small movement in the value of the underlying asset can cause a large movement in the value of the FDI and therefore, investment in such instruments may result in losses in excess of the amount invested by the Sub-Fund. While the Sub-Fund uses an FDI overlay strategy which is intended to provide income, there is no guarantee that the derivative strategy will achieve this. The Sub-Fund may forego some capital appreciation potential, while retaining the risk of loss should the price of the underlying decline.

Selling call options will create exposure for the Sub-Fund, as it may have to deliver the underlying securities or their value and, should the market move unfavourably, this may result in an unlimited loss. REITs and real estate related investments are subject to the risks associated with the ownership of real estate which may expose the relevant Sub-Fund to increased liquidity risk, price volatility and losses due to changes in economic conditions and interest rates. The Distributing Share Classes give priority to dividends, rather than to capital growth, and may at times distribute capital gains. Since the instruments held by the Sub-Fund may be denominated in, or have exposure to, currencies other than the Base Currency, the Sub-Fund may be affected unfavourably by exchange control regulations or fluctuations in currency rates. For this reason, changes in currency exchange rates can affect the value of the Sub-Fund's portfolio and may impact the value of the Shares. Sustainability risk may materially negatively impact the financial condition or operating performance of an issuer and therefore the value of that investment. In addition, it may increase the Sub-Fund's volatility and/or magnify pre-existing risks to the Sub-Fund. Further information about risks can be found in the "Risk Information" section of the Prospectus
