Important Information

- SPDR® Gold Trust (the "Trust") is an exchange traded fund designed to track the price of gold (net of Trust expenses) and fluctuation in the price of gold may materially and adversely affect the value of the shares. The shares may trade at a price which is at, above or below the NAV per share.
- Investing in one single commodity asset class may result in higher price volatility compared to more diversified mutual funds or unit trusts.
- The Trust is not managed and no attempt will be made to buy or sell gold to protect against or take advantage of fluctuations in the price of gold.
- The Trust's gold is not insured and may be subject to loss, damage, theft, or restriction on access.
- Since the shares can only be created or redeemed in USD, investors taking advantage of the multi-counter arrangement in HKD and RMB are subject to currency risk. RMB is currently not freely convertible and is subject to exchange controls and restrictions.
- The Trust may not be suitable for all investors. Investors should not invest based on this marketing material only. Investors should read the Trust's prospectus, including the risk factors, consider the product features and their own investment objectives, risk tolerance level and other circumstances and seek independent financial and professional advice, as appropriate, prior to making any investment.

Fund Objective

The investment objective of SPDR® Gold Trust (the "Trust") is for the shares to reflect the performance of the price of gold bullion, less the Trust's expenses.

The Price of Gold

The spot price for gold bullion is determined by market forces in the 24-hour global over-the-counter (OTC) market for gold. The OTC market accounts for most global gold trading, and prices quoted reflect the information available to the market at any given time. The price, holdings, and net asset value of the Shares, as well as market data for the overall gold bullion market, can be tracked daily at www.spdrgoldshares.com *.

The performance of the Trust and the LBMA Gold Price PM is HKD converted and may differ from the performance in USD terms due to FX rate fluctuation. Performance is calculated based on NAV-To-NAV, in HKD, including ongoing charges and excluding the Trust's trading costs on the SEHK, and including the reinvestment of any dividend. No dividends were issued during the period, nor are any expected to be issued in future periods. Calendar year performance figures show by how much the fund increased or decreased in value during the calendar year being shown. Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate, so you may have a gain or loss when shares are sold. Current performance may be higher or lower than that quoted. Visit www.spdrgoldshares.com * for most recent month-end performance. Performance returns for periods of less than one year are not annualised.
Effective March 20, 2015, the SPDR Gold Trust (2840) adopted the LBMA Gold Price PM as the reference benchmark price of gold in calculating the Net Asset Value (NAV) of the Trust. Prior to that date, the Trust used the London PM Fix as the reference benchmark price in calculating the NAV.
2 The ongoing charges figure is based on expenses for the 12 month period ended 31 December 2025. The figure may vary from year to year. The ongoing charges figure is an annual figure calculated by adding the applicable charges and payments deducted from the assets of the Trust and then dividing by the NAV for the year attributable to the relevant share class.
