MORNINGSTAR OVERALL RATING™¹

Among 90 Convertible Bond - Global funds. The Fund's risk-adjusted returns based on Class I USD Accumulating had 4 stars for 3 years, 5 stars for 5 years and 5 stars for 10 years out of 90, 76 and 60 Convertible Bond - Global Funds, respectively, for the period ended 29/2/2024.

ASSETS UNDER MANAGEMENT

Total Net Assets: \$487.0 M

OVERVIEW

The UCITS fund invests in global convertible securities with the aim of rebalancing risk/reward while providing growth and income.

The fund is actively managed and is suitable for long-term investors.

The fund uses the Refinitiv Global Convertible Bond Index and MSCI World Index as comparative benchmarks but not to constrain the fund's portfolio or as a target for performance.

KEY FEATURES

- » Provides broadly diversified exposure to the global convertible bond universe.
- » Leverages more than 40 years of research in convertible security investing.
- » Seeks to provide upside participation in equity markets with less exposure to downside than an equity-only portfolio over a full market cycle.
- » Blends global investment themes and fundamental research via active management.

PORTFOLIO FIT

Consisting of convertible securities that can participate in upside equity movements with potentially limited downside exposure, the fund can provide a means to manage risk in conjunction with an equity allocation. The fund can also serve a role within a fixed-income allocation, as convertibles have performed well during periods of rising interest rates and inflation.

Calamos Active Management and Global Perspective Seek to Maximize the Potential Benefits of Convertibles

Defensive Equity. For more than 40 years, Calamos has advocated convertible securities for investors seeking upside participation in equity markets with less downside exposure than an equity-only portfolio over a full market cycle.

Enhanced Fixed Income. Convertibles can diversify fixed income and hedge the risk of rising rates.

Global Diversification. Because the opportunity sets differ across economies, global convertibles can provide improved prospects for alpha generation, downside mitigation and income.

IMPORTANT INFORMATION. Portfolios are managed according to their respective strategies which may differ significantly in terms of security holdings, industry weightings, and asset allocation from those of the benchmark(s). Portfolio performance, characteristics and volatility may differ from the benchmark(s) shown. Average annual total return measures net investment income and capital gain or loss from portfolio investments as an annualised average. All performance shown assumes reinvestment of dividends and capital gains distributions. The Fund also offers Class C and X shares, the performance of which

may vary. Performance shown reflects the management fee. Returns greater than 12 months are annualised. All performance shown assumes reinvestment of dividends and capital gains distributions. Sources for performance data: Calamos Advisors LLC, RBC Investor Services Ireland Limited ("RBC"). The Refinitiv Global Convertible Bond Index is designed to broadly represent the global convertible bond market. The MSCI World Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. Morningstar Convertible Bond - Global Category funds invest principally in convertible securities of issuers from around the world. Unmanaged index returns assume reinvestment of any and all distributions and, unlike fund returns, do not reflect fees, expenses or sales charges. Investors cannot invest directly in an index. Alpha is a measurement of performance on a risk adjusted basis. A positive alpha shows that performance of a portfolio was higher than expected given the risk. A negative alpha shows that the performance was less than expected given the risk. Beta is a measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole. Conversion premium is the amount by which the market price of a convertible bond or convertible preferred exceeds the conversion value, expressed as a percentage. It is a gauge of equity participation. Delta expresses the convertible's sensitivity to changes in the stock price. It expresses the change in the convertible price per unit of change in the underlying stock price. Investment premium is the amount that the market price of the convertible is above its investment value, expressed as a percentage. It is a gauge of equity participation. Sharpe ratio is a calculation that reflects the reward per each unit of risk in a portfolio. The higher the ratio, the better the portfolio's risk-adjusted return is. R-squared is a mathematical measure that describes how closely a security's movement reflects movements in a benchmark. Standard deviation is a measure of volatility. © 2024 Calamos Investments LLC. A sub-fund of Lazard Global Investment Funds, an Irish UCITS investment fund company

This is a marketing communication. This is not a contractually binding document. Please refer to the prospectus of the UCITS and to the PRIIPs KID before making any final investment decisions.

Fund Description

The Lazard Global Convertibles Investment Grade Fund seeks to outperform the Refinitiv Global Focus Investment Grade Convertible Index over an extended time frame. The team uses a fundamental, bottom-up approach comprised of rigorous qualitative and quantitative analysis to drive security selection, and a top-down process that guides tactical positioning. The Fund will primarily consist of investment grade global convertible bonds, with a maximum 10% equity position reflecting bond conversions, and typically holds 40-65 securities. The team may employ futures contracts to adjust exposures to currencies, interest rates and equities, and currency forwards, primarily for hedging.

Risk Rating

Key Risks Related to the Fund

There is no capital guarantee or protection of the value of the Fund. The value of your investment and the income from it can go down as well as up and you may not get back the amount you originally invested.

There is a risk with convertible bonds that their value, when converted into equity securities, will vary to those of non-convertible equity securities, and their yield will be less than non-convertible debt securities. Additionally, such securities may have a mandatory equity conversion feature, which may result in receiving equity when it is declining or at an unfavourable price.

Investment in lower rated bonds increases the risk of default on repayment and the risk to capital of the Fund.

Key Risks Related to the Share Class

The returns from your investment may be affected by changes in the exchange rate between the Fund's base currency, the currency of the Fund's investments, your share class and your home currency.

This is an unhedged share class, your shares will be exposed to exchange rate fluctuations between their denominated currency and the base currency of the Fund. This may affect the performance of your shares.

See "Risk Factors" in the UCITS' Prospectus and Fund Supplement for more information about risks.
