## Performance information

Source: J.P. Morgan Asset Management. Share class performance is shown based on the NAV (net asset value) of the share class with income (gross) reinvested including actual ongoing charges excluding any entry and exit fees.

The return of your investment may change as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation.

Indices do not include fees or operating expenses and you cannot

invest in them.

The benchmark is for comparative purposes only unless specifically referenced in the Sub-Funds' Investment Objective and Policy.

Dividend income shown is gross of any applicable tax.

Our primary aim is to maximise yield and as such the portfolio does not have a target of outperforming the benchmark. The Benchmark provides an indication of the risk profile of the fund.

## Holdings information

\*This exposure represents a number of individual equity linked notes with various counterparties. Top 10 holdings exclude derivative instruments, cash and cash equivalents.

Non rated includes equities.

VaR is a means of measuring the potential loss to a Sub-Fund due to market risk and is expressed as the maximum potential loss at a 99% confidence level. The holding period for the purpose of calculating global exposure is one month.

## Definitions

**NAV** Net Asset Value of a fund's assets less its liabilities per Share.

**Overall Morningstar Rating™** assessment of a fund's past performance, based on both return and risk and shows how similar investments compare with their competitors. Investment decisions should not be based on a high rating alone.

**Beta** measures a fund's sensitivity to market movements (as represented by the fund's benchmark). A beta of 1.10 suggests the fund could perform 10% better than the benchmark in up markets and 10% worse in down markets, assuming all other factors remain constant. Usually the higher betas represent riskier investments.

**Annualised volatility (%)** measures the extent to which returns vary up and down over a given period.

**Sharpe ratio** performance of an investment adjusting for the amount of risk taken (compared a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken.
