² Yield to Maturity (YTM) of a bond is the average annualised rate of return expected if held to maturity. Weighted Average YTM (%) is calculated by weighting the bonds with market capitalisation. Figure is in local currency yield terms and on unhedged foreign exchange basis. Please note that weighted average YTM does not represent the fund's actual rate of return or distribution yield.

³ Duration is a measure of a bond's sensitivity to interest rate changes. Weighted Average Duration (years) is weighted by the market value of each bond relative to the total portfolio market value. Please note that this figure is provided for reference only.

⁴ Cash is included in the calculation of the average credit rating and is rated as AAA regardless of currencies held. The credit ratings of the underlying fixed income securities are determined by S&P and/or Moody's, and where official credit ratings are unavailable, Amova Asia's internal credit ratings are used.
